

RFID

Internet Security Mouse

- PCSC standard 2.01
- The ultimate safeguard to online identification and payment
- Auto-login to multiple user favorite websites with included Login2Go™ security software.
- Contactless NFC reader/writer for RFID/NFC enabled tag cards, credit cards, cell phones and wrist watches etc...

RFID is an advanced and innovative, wireless identification technology. Macally PCSC NFC eNetMouse with integrated contactless NFC reader/writer supports our eNetCard (NXP® Mifare® standard), many RFID/NFC enabled credit cards and devices. Macally eNetCard provides authentication check during the login process and gives a unique internet identity to the user. Make fast, easy payments with many RFID enabled credit cards and devices. Partnered with Login2Go™, users can auto-login to multiple websites to make online purchases safely and easily.. PCSC standard compatibility also allows software engineers efficiently develop and deploy RFID application with PCSC NFC eNetMouse.

Features

- Support existing PCSC smartcard applications
- Zero effort to migrate your contact applications to contactless applications
- Integrated NFC reader/writer and USB optical* mouse
- Make easy payments with enabled contactless credit cards and cell phones
- Tag compatibility (read/write):
14443A, all NXP® Mifare® family, and Sony® FeliCa
- PCSC application compatibility
- ISO 14443A (T=CL) 13.56 MHz frequency

* Macally optical sensor mouse functions best on surfaces with detail for tracking (e.g., wood, plastic, cloth etc.)
It may not function on reflective, repetitive pattern or non-visible detail surfaces (e.g., glass)

Login2Go™ Security Software

- Provide authentication check during login and give user a unique internet identity
- Save time by eliminating the hassle of entering names and passwords to login to secure websites
- Prevent spywares from stealing personal information during login process
- Auto-login to multiple user favorite websites

System Requirements

- Windows 2000, Windows XP, Windows 2003 or Windows Vista
- Any desktop or notebook computer with an available USB port

Enabled By
RF Cyber
